EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Patti on 09/12/2005.

The application has been amended as follows:

Claims 1-14 and 21-23 have been cancelled from the application.

REASON FOR ALLOWANCE

2. Crowell, Beiswenger, and Theurer et al disclose various types of railroad ballast tamping tool comprising a blade having a height, a width and a depth, being substantially rectangular in shape, the blade tapering at a bottom end and having a groove cut into the bottom end of the blade across the width, a front side of the blade having a layer of tiles of a wear-resistant material secured thereto, overlying substantially the entire front side of the blade. Taylor discloses a taping tool comprising a blade having a height, a width and a depth, being substantially rectangular in shape, the blade tapering at a bottom end and having a groove cut into the bottom end of the blade across the width, a wear resistant material secured in the groove along the bottom width of the blade having a slot opening. However, none of the references of record suggests a railroad ballast tamping tool, wherein a wear resistant material having a "T" shape with a rounded top being secured in the groove along the bottom width of

the groove in the manner defined in the instant claims 15, 25 and in combination with other limitations of the claim. Therefore, claims 16-20, 24, 26-30, 32 and 36, depending therefrom, are considered to be allowable.
